

devolo presenting new WiFi 7 and fibre-optic solutions at ANGA COM 2026

Aachen, 13 May 2026 – At the ANGA COM trade fair in Cologne, from 19 to 21 May, devolo will present innovative new products for any home network. The focus will be on two high-performance WiFi 7 fibre-optic Ethernet routers that can also be used easily as a mesh system or an access point: the devolo WiFi 7 BE6500 and the devolo WiFi 7 BE9300 Tri-Band.

The topics of this press release:

- A complete home network from a single source
- A detailed look at the new WiFi 7 routers
- More speed and stability with WiFi 7
- Flexible product packages for end customers and ISPs
- Events at ANGA COM

A complete home network from a single source

Through the addition of new WiFi 7 mesh routers, devolo is expanding its home networking ecosystem consisting of Powerline adapters, mesh systems and Wi-Fi repeaters. Installation and fine tuning are performed easily via the devolo Home Network app. As a full-service supplier, devolo offers all the components for a perfectly coordinated home network from a single source.

A detailed look at the new WiFi 7 routers

Thanks to a discreet design, both models blend harmoniously into any living environment. They support state-of-the-art security standards, including WPA3, and offer advanced WiFi 7 technologies such as Multi-Link Operation, OFDMA, MU-MIMO and Band Steering. Four Ethernet ports (3× 1 Gbps, 1× 2.5 Gbps) are available for wired devices.

More speed and stability with WiFi 7

The new Wi-Fi standard 802.11be ensures higher bandwidths, lower latencies and significantly better coverage for many clients. The routers wirelessly transmit on 2.4, 5 and 6 GHz and are fully backward compatible with older Wi-Fi standards.

The model designations stand for the maximum Wi-Fi speed:

devolo WiFi 7 BE6500: up to 6500 Mbps

devolo WiFi 7 BE9300 Tri-Band: up to 9300 Mbps

Flexible product packages for end customers and ISPs

devolo offers both routers as an individual device, as mesh kits of 2 or 3 devices and as a separate mesh extension kit. The devolo WiFi 7 BE6500 is already available in shops. The top-of-the-range BE9300 Tri-Band model will be available in a few weeks. This means that both end customers and Internet service providers can find the package that is an optimal fit for their network or their portfolio.

Events at ANGA COM

At ANGA COM, devolo will be introducing the new WiFi 7 mesh routers and the upcoming Powerline and repeater portfolio to a large audience of experts.

Internet service providers and members of the press are cordially invited to attend personal presentations and discussions.

About devolo

devolo develops intelligent home networking solutions for household customers and offers everything for stable and reliable Wi-Fi from a single source. The portfolio includes secure routers, high-performance mesh Wi-Fi systems and practical network accessories. The main product is devolo Magic – a technology that makes it possible to establish smart networks over existing electrical wiring. The product portfolio is rounded off with innovative solutions for fibre-optic connections. This is how devolo ensures reliable, seamless networking throughout the home.

In the professional sector, devolo is a reliable partner of international telecommunications providers, global industrial corporations, leading medium-sized companies and the dynamic energy industry. Wherever secure, high-performance data communication is needed, partners rely on devolo.

With over 50 million products sold, devolo belongs to the world's market leaders. More than 1,000 international top-product test reviews and distinctions underscore our leadership in innovation. devolo was founded in 2002 in Aachen, Germany, and today is actively represented in more than 10 countries.
